

# Worker representation and consultation on health and safety

An analysis of the findings of the European Survey of Enterprises on New and Emerging Risks (ESENER)

European Risk Observatory Report

# Contents

Foreword	7
Executive summary	9
Introduction	15
1. Aims of the study	15
2. The broad findings of the ESENER survey concerning worker representation on health and safety and on managing psychosocial risks	16
3. Worker representation and consultation and psychosocial risks	17
4. What is already known about worker representation in occupational safety and health: an international review of the literature	18
4.1. What do we mean by worker representation and consultation?	18
4.2. The coverage and effectiveness of worker representation on health and safety	19
4.3. Characteristics of health and safety representatives	23
4.4. Activities of worker representatives on health and safety	24
4.5. Effectiveness	25
4.6. Worker representation and psychosocial risks	27
4.7. Summary	28
5. Methodological approaches to the further analysis of the ESENER data on worker representation and health and safety management	29
6. Summary of the findings of the further analysis of the ESENER data	30
6.1. Stage 1: Worker representation	31
6.2. Stage 2: Health and safety management	33
6.3. Stage 3: Process, outcomes and inhibitors to OSH management	34
6.4. Stage 4: The case of psychosocial risk management	36
6.5. Stage 5: Corroboration with employee representative variables	42
7. Some comparisons between countries, sectors and regulatory styles	44
7.1. Comparisons by sector	44
7.2. Comparisons by country and by regulatory framework type	46

8. A national case study — the United Kingdom Workplace Employment Relations Survey (WERS) 2004	49
8.1. Introduction	49
8.2. Structure of the analysis	49
8.3. Worker representation in the United Kingdom	50
8.4. Workplace characteristics and consultation	51
8.5. Representation, consultation and occupational ill health	51
8.6. Summary	52
9. Some comparisons with the European working conditions survey (EWCS) 2005 and 2010	53
10. Conclusions: implications for policy and future research	54
11. References	58
